

# PAEDIATRIC NURSING SKILLS MADE EASY

First Edition

**P**aediatric Nursing Skills Made Easy addresses variations in the care of a hospitalized child within the local context. The importance of correct identification for the child, the practice of hand hygiene and giving of clear information to a child as developmentally appropriate are emphasized. The various chapters cover important procedures which include measurement, monitoring of vital signs and other clinically important parameters, including diagnostics and therapeutic-related procedures. This book focuses on providing care to meet the unique needs of the hospitalized child. This book meets the requirement of on-hand reference for nursing students.

**Chan Kim Geok**, a senior lecturer who is also the Program Coordinator in the Department of Nursing, Universiti Malaysia Sarawak obtained her PhD from University of Malaya (2011). She completed her Master of Nursing (Paediatric, Child & Youth Health) from Queensland University of Technology, Brisbane, (2002), Post-Basic in Paediatric Nursing and midwifery cum public health nursing. Besides teaching, she has broad experience as a practice nurse in various disciplines as operation theatre nurse, medical-surgical nursing and paediatric nursing.

**Shalin Lee**, a lecturer in the Department of Nursing, Universiti Malaysia Sarawak obtained her Master of Nursing Science with High Distinction from University of Malaya (2014), Post-Basic in Paediatric Nursing with Academic Excellent Achievement Award from the Ministry of Health Malaysia (2012), Bachelor of Nursing with Honours with First Class Degree (2008) and multiple awards such as Royal Education Award, Deputy Chancellor Award, Best Faculty Graduate Award and five consecutive Dean's List Awards from Universiti Malaysia Sarawak. She is also equipped with knowledge and skills from persistent trainings such as Paediatric Life Support (PLS) and Paediatric Advanced Life Support (PALS) (awarded PALS provider). Besides teaching and producing publications in high-impact journals, she has vast experience as a clinical nurse via self-attachments in various disciplines such as paediatric nursing and medical-surgical nursing.
