Forum on heart disease among the young on Sept 28

SIBU: Renowned cardiologist Dr Tang Sie Hing will give a talk on "Heart Disease Among the Young" at a forum organised by Sibu DAP Socialist Youth (Dapsy) here on Sept 28 at 7.30pm.

Sibu Dapsy secretary Lau Hui Ung said the forum was organised to highlight the problem of heart disease among the youth and Dr Tang would share his knowledge and experiences on the problem.

According to Lau, more young people were now suffering from heart disease probably due to unhealthy lifestyle or work pressure.

Sibu-born Dr Tang graduated from the University of Melbourne, Australia in 2004.

His working experiences include serving as a lecturer in internal medicine and cardiology at University Malaysia Sarawak (Unimas) between 2005 and 2007 and thereafter was Consultant Interventional Cardiologist and Physician at several private medical centres in the state.

In 2012, he established his own SH Tang Heart and Arrhythmia Centre in Kuching.

Lau said the forum would also have a question-and-answer session when Dr Tang would answer relevant/related questions.

The forum will be held at Paramount Hotel and admission is free.
