FINAL PROFESSIONAL EXAMINATION
MD Degree

Session 2004/2005

OBJECTIVE STRUCTURED CLINICAL EXAMINATION
(OSCE)

April 2005

Time: 2 hours 30 minutes

Date : Tuesday, 26 April, 2005
Time : 8:30 a.m. – 11:00 a.m. [1st session]
11:30 a.m. – 2:00 p.m. [2nd session]
Venue : FPSK, UNIMAS, Lot 77, Kuching

INSTRUCTIONS:

- 1. There are TWENTY (20) Stations.**
- 2. The time to be spent at each station is FIVE (5) minutes.**
Write your answer clearly in the space provided. DO NOT write outside the space.
Write your Student No. on every page.
No part of this examination booklet should be taken away from the examination room.
Please fill in your attendance sheet.

Medicine Programme Session 2004/2005 Year 5
Final Professional Examination
Tue. 26/04/2005 [8:30 a.m. – 11:00 a.m.] – 1st session
[11:30 a.m. – 2:00 p.m.] – 2nd session

OSCE

Student No.: _____

Station No.: 1

This is the photograph of the hand of two-year-old Leena who was admitted with fever and ulcers in her mouth for two days. She has lesions similar to the ones in the photograph in her feet as well.

Study this exhibit carefully and answer the following questions.

1.1 Describe the lesions seen on Leena's hand.

(2 marks)

1.2 State the most likely diagnosis of Leena's condition.

(2 marks)

1.3 State ONE aetiological agent responsible for Leena's illness.

(2 marks)

1.4 List TWO likely complications that Leena might develop.

(2 marks)

(i) _____

(ii) _____

1.5 Discuss briefly the principles of management of Leena's condition.

(2 marks)

Medicine Programme Session 2004/2005 Year 5
Final Professional Examination
Tue. 26/04/2005 [8:30 a.m. – 11:00 a.m.] – 1st session
[11:30 a.m. – 2:00 p.m.] – 2nd session

OSCE

Student No.: _____

Station No.: 2

A 56-year-old man complained of pain at the back of the right ankle, and inability to walk properly for 4 months following missing footstep while climbing a staircase. He was actively involved in playing golf.

Examination revealed defect as shown in the photograph.

2.1 What is the diagnosis?

(2 marks)

2.2 State TWO functional disabilities in this patient resulting in the above problem.

(2 marks)

(i) _____

(ii) _____

2.3 Name ONE important clinical test that is performed to help in the diagnosis, and describe how it is done.

(4 marks)

2.4 What is the best mode of treatment for this patient's problem?

(2 marks)

OSCE

Student No.: _____

Station No.: 3

Displayed is the picture of the right hand of a 65-year-old man who developed acute severe pain of small joints of this hand followed by the acute condition (shown in the picture) after starting frusemide tablets for his congestive cardiac failure. He gave 10 years' history of joints pains once or twice a year which used to subside by taking NSAIDS for 4-5 days.

3.1 State **THREE** abnormalities seen in his right hand. (3 marks)

- (i) _____
- (ii) _____
- (iii) _____

3.2 State the most likely diagnosis **and** give reasons. (2 marks)

3.3 List **TWO** investigations, which are helpful to confirm the diagnosis. (2 marks)

- (i) _____
- (ii) _____

3.4 List **FOUR** most relevant management plans for this patient. (3 marks)

- (i) _____
- (ii) _____
- (iii) _____
- (iv) _____

Medicine Programme Session 2004/2005 Year 5
Final Professional Examination
Tue. 26/04/2005 [8:30 a.m. – 11:00 a.m.] – 1st session
[11:30 a.m. – 2:00 p.m.] – 2nd session

OSCE

Student No.: _____

Station No.: 4

Mr. AM is a 48-year-old man who came to Sarawak General Hospital with cough, occasional blood-stained sputum, loss of appetite, loss of weight and night sweats for the past six weeks. His recent chest X-ray is displayed.

4.1 List **TWO** features to suggest that this chest X-ray is a PA view.

(2 marks)

- (i) _____
(ii) _____

4.2 List **THREE** radiological abnormalities seen on the chest X-ray.

(3 marks)

- (i) _____
(ii) _____
(iii) _____

4.3 Name **TWO** other relevant radiological investigations for this patient.

(2 marks)

- (i) _____
(ii) _____

4.4 Give **THREE** differential diagnoses.

(3 marks)

- (i) _____
(ii) _____
(iii) _____

Medicine Programme Session 2004/2005 Year 5
Final Professional Examination
Tue. 26/04/2005 [8:30 a.m. – 11:00 a.m.] – 1st session
[11:30 a.m. – 2:00 p.m.] – 2nd session

OSCE

Station No.: 5

INTERACTIVE STATION

Instructions to the candidate

Mr. Yeo suddenly collapsed in the house and has been brought unconscious to the Accident and Emergency Department. The accompanying relatives say that he had vomited twice on the way to the hospital.

You are to demonstrate on the manikin how you would perform a CPR.

Medicine Programme Session 2004/2005 Year 5
Final Professional Examination
Tue. 26/04/2005 [8:30 a.m. – 11:00 a.m.] – 1st session
[11:30 a.m. – 2:00 p.m.] – 2nd session

OSCE

Student No.: _____

Station No.: 5

CHECKLIST

		Marks Allocated	Marks Obtained
1.	Call for help.	1	
2.	Airway: Look for any response by shouting, "Are you all right?"	1	
3.	Open mouth and maintain airway with jaw thrust/chin lift/head extension.	2	
4.	Breathing: Look at the lips while watching the chest.	1	
5.	Circulation: Feel carotid pulse for 5 seconds: if absent begin external cardiac massage. Place one hand on top of the other at the lower end of the sternum and give sharp compression to depress 3-4 cm each time. If alone, for every 15 compressions, 2 breaths.	5	
	Total =	10

Station No.: 7 INTERACTIVE STATION

Instructions to the candidate

Madam SH is a 45-year-old Malay teacher, Para 3 presented with uterine fibroid. She is planned for a total abdominal hysterectomy.

Please counsel her and take consent.

Medicine Programme Session 2004/2005 Year 5
Final Professional Examination
Tue. 26/04/2005 [8:30 a.m. – 11:00 a.m.] – 1st session
[11:30 a.m. – 2:00 p.m.] – 2nd session

OSCE

Station No.: 7

INTERACTIVE STATION

Instructions to the patient

You are Madam SH 45-year-old teacher with three children who have uterine fibroid and will undergo total abdominal hysterectomy (removal of the womb).

You are very anxious about the surgery and its complications.

You may ask her/him the following questions: (if students are not forth-coming)

- 1. What is total abdominal hysterectomy?**
- 2. Why I need to undergo this operation?**
- 3. Is there any other mode of treatment for my problems?**
- 4. How about my ovaries, are they going to remove them as well?**
- 5. What are the complications of this surgery?**

Medicine Programme Session 2004/2005 Year 5
