NEWSTACK

News & Stories

News & Stories highlight news, articles and current issues that are relevant to the user. The latest news is always shown first,allowing the user to be up to date from within the mobile application.

Events

Events allow users to receive notifications of activities such as lectures or convocation details. The notifications include important details like date, time and venue so users can attend the activities.

Announcement

Announcement allows quick broadcast of important notices and official notifications through a mobile application.

Conferences

Conferences are notifications concerning conferences, such as date, time and venue. Users can also view a list of previous conferences.

Tenders

Tenders provide notification regarding tender contracts allowing for vendors a quick and up-to-date access to any business opportunity from the organization.

Vacancies

Vacancies allow users to receive notifications
concerning any job vacancy in the organization. The notice can also be shared using the Sharing feature from within the mobile application.

Virtual ID

The Virtual ID is a digital representation of your personal details in a QR code format. The Virtual ID can be used to log your attendance for meetings, events and class. It can also be used as your identity to facilitate online payments through the cashless payment feature.
