

Tajuk : Research Fellowship Vacancy

Research Fellowship Vacancy

This scheme is open for outstanding early to mid-stage candidate working in areas of information security and will significantly contribute Malaysia's research and innovation capacity. The scheme provides the opportunity to build an independent research career. In addition, it encourages research in Malaysia by the best and brightest researchers who can demonstrate a capacity to build collaboration across research institutions, industries and other disciplines. At the end of the fellowship, successful candidate will be awarded with a master degree.

As part of our team you will be working as a research fellow researching and developing techniques in the field of information hiding.

Responsibilities

1. Review current state-of-the-art related to information hiding.
2. Develop new techniques of information hiding.
3. Contribute and deliver the new finding in information hiding research community.

Requirements

1. Degree in Computer Science or related degree.
1. A solid foundation in computer science, with strong competencies in data structures, algorithms and problem solving.
2. Deep technical knowledge of programming (i.e., C++, Java, Python, MATLAB).
3. Proficiency in English language is essential.
4. Extremely proactive, organized, responsible and proven ability to work independently.
