**KUCHING:** The intake of 1,200 new students pursuing Unimas' Foundation Studies in Science took their oath yesterday.

The freshmen were among those selected for the Fundamental Life Science and Fundamental Physical Science programmes for a year (two semesters), after which degree programmes in Unimas await those who are eligible.

Vice chancellor Professor Dato Dr Mohamad Kadim Suaidi said since technologies had altered the shape of industries and jobs, the students should be aware of the demands of the current education system.

"Learning here, in the Centre for Pre-University Studies (PPPU), is not just about examinations only. Students will have the opportunity to learn about leadership, entrepreneurship, and get the chance to engage with the community through outdoor programmes."

PPPU, for the first time,

Unimas' Foundation Studies in Science students taking their oath yesterday. These students will be pursuing the Fundamental Life Science and Fundamental Physical Science programmes for a year (two semesters).

successfully organised a programme called Scienceploration Camp that targets Sijil Pelajaran Malaysia (SPM) and Upper Six students.

The programme shows PPPU's intent to become one

of the autonomous models for Unimas.

Mohamad Kadim hoped the new students would abide by the rules and regulations of Unimas.

"We want students to adhere to the University and College

Act 1971 and all the laws in the country. This is to ensure the discipline and good name of Unimas is protected."

Also present was Unimas Board of Directors chairman Datu Dr Hatta Solhi.
