CONTENTS

FOREWORD		xiii
PREFACE		xv
ACKNOWLEDGEMENT		xvii
TABLE OF CONTENTS		vii
LIST OF FIGURES		x
LIST OF TABLES		xii
SYMBOLS USED		xii
CHAPTER ONE	INTRODUCTION	1
1.1	Consent	
1.2	Patient confidentiality, privacy and dignity	
1.3	Correct patient identification	
1.4	Appropriate documentation	
1.5	Hand hygiene	
CHAPTER TWO	MEASUREMENT PROCEDURES	9
2.1	Measuring weight and length	
2.2	Measuring head circumference	
CHAPTER THREE	MONITORING VITAL SIGNS	23
3.1	Respiratory rate	
3.2	Heart rate (pulse rate)	
3.3	Blood pressure	
3.4	Temperature	
3.5	Pain assessment	
CHAPTER FOUR	MONITORING CLINICALLY IMPORTANT PARAMETERS	33
4.1	Oxygen saturation: pulse oximetry	
4.2	Paediatric early warning signs	
4.3	Neurologic assessment: Modified Glasgow Coma Scale	

4.4	Peak expiratory flow rate: using peak flow meter	
4.5	Urine output	
CHAPTER FIVE	ADMINISTRATION OF MEDICATIONS: ORAL, INTRAVENOUS AND RECTAL	49
5.1	Administering oral medications Formula to calculate required oral medication dose	
5.2 A	Reconstitute powdered medication in a vial	
5.2 B	Administering intravenous medications Formula to calculate required amount of medication from vial/ampoule	
5.3	Administering rectal suppository	
CHAPTER SIX	AIRWAY-RELATED PROCEDURES	79
6.1	Suctioning the airway passage: Nasopharyngeal and Oropharyngeal	
6.2	Administering oxygen via nasal prong or mask	
6.3	Administering aerosol therapy via metered-dose inhaler and spacer	
6.4	Administering aerosol therapy: nebulization	
CHAPTER SEVEN	FLUID THERAPY VIA ORAL AND INTRAVENOUS ROUTES	99
7.1	Administering oral rehydration solution	
7.2	Administering intravenous fluids	
CHAPTER EIGHT	NEONATAL JAUNDICE-RELATED PROCEDURES	109
8.1	Nursing neonates under phototherapy	
8.2	Assisting in exchange transfusion	
CHAPTER NINE	SELECTED THERAPEUTIC PROCEDURES	123
9.1	Inserting oro/nasogastric tube	
9.2	Applying local anaesthetics (EMLA)	
9.3	Assisting lumbar puncture	
CHAPTER TEN	HYGIENE CARE PROCEDURES	137
10.1	Bathing infant	
10.2	Performing newborn cord care	

CHAPTER ELEVEN	COLLECTION OF SPECIMENS: BLOOD	149
11.1	Collecting blood specimen via capillary	
11.2	Collecting blood specimen via peripheral vein	
11.3	Collecting blood specimen via scalp vein	
CHAPTER TWELVE	COLLECTION OF SPECIMENS: URINE AND STOOL	163
12.1	Collecting urine specimen using paediatric urine bag	
12.2	Collecting urine specimen using clean-catch method	
12.3	Collecting stool specimen

FOREWORD

Paediatric Nursing Skills Made Easy, a long-awaited publication from the Department of Nursing addresses the variations in the care of hospitalized child common within the local context.

The details as presented in relation to the various procedures and the related rationales will enhance students' understanding of how procedures are performed and why they are performed. Important aspects of care provision to meet the unique needs of hospitalized child, including the correct identification for the correct child, the practice of hand hygiene and the giving of developmentally appropriate information to children are emphasized.

I strongly recommend this book to our nursing students as an important reading and a useful reference for students, in particular for those who register for pediatric nursing course.

PAEDIATRIC NURSING SKILLS MADE EASY

First Edition

Paediatric Nursing Skills Made Easy addresses variations in the care of a hospitalized child within the local context. The importance of correct identification for the child, the practice of hand hygiene and giving of clear information to a child as developmentally appropriate are emphasized. The various chapters cover important procedures which include measurement, monitoring of vital signs and other clinically important parameters, including diagnostics and therapeutic-related procedures. This book focuses on providing care to meet the unique needs of the hospitalised child. This is a beneficial on-hand reference for nursing students besides other recommended nursing textbooks.

CHAN KIM GEOK is a senior lecturer in the Department of Nursing, Faculty of Medicine & Health Sciences, Universiti Malaysia Sarawak.

SHALIN LEE WAN FEI is a lecturer in the Department of Nursing, Faculty of Medicine & Health Sciences, Universiti Malaysia Sarawak.
