RELATIONSHIP BETWEEN THE USE OF MANAGEMENT ACCOUNTING INFORMATION SYSTEM AND THE PERFORMANCE OF GOVERNMENT CLINICS

Shahrifah Sabrina Syed Ali, Michael Tinggi, Mohd Waliuddin Mohd Razali and Aslinda Ahmad Som
Universiti Malaysia Sarawak, Malaysia

This study examines the relationship between the use of management accounting information system and the performance of government clinics in Kuching. The samples of this study are consisting of 10 government clinics such as Polyclinics and 1 Malaysia clinics. A questionnaire survey was used to collect the data. The use of management accounting information system is found to have no relationship with the performance of an organization. However, improved internal process and the introduction of the KPI bring about better performance in the government clinic. This study is useful for the public and government sector to look on the management accounting information system particularly on government clinics in Kuching. The study is important to all interested parties on the need to take knowledge on accounting particularly in management accounting information system practices and the performance of the public organization.

Keywords: Management accounting information system, internal processes, learning & organizational innovation, key performance indicator.
