Abstract

Small and medium enterprises of the whole world today, constitute more than 90% of the whole business entities throughout the world. Small and medium enterprises play a tremendous role in any economy like Pakistan as Pakistan is strategically located on the most important trade route between Asia and Europe. In Pakistan economy the manufacturing small and medium enterprises contribute more to the Pakistan’s economy. As the pharmaceutical industry in today’s world is an important and fundamental sector and is considered as a basic necessity in any locality of the globe. But one third of the whole population of the world at present do not access to the basic drugs of life. At the same time majority of the pharmaceutical industry of Pakistan comprise of small and medium enterprises and unfortunately face serious threats and simultaneously the empirical research in this sector is at initial stages.

Keywords: SMEs, Pakistan, Manufacturing, Pharmaceuticals, Economy, Empirical Research, Social Sciences.

1. Introduction to Small and Medium Enterprises of Pakistan

Small and medium enterprises (SMEs) are essential to the economy of every country, particularly developing economies and are contributing dominantly in the economy of Pakistan since its independence (Hussain, Farooq, & Akhtar, 2012). Khan, Awang & Zulkifi (2013) reported that the facts and figures of UNIDO show that 90 percent businesses world-wide fall into the category of SME sector and provides approximately 60 percent employments around the world. The small and medium enterprises (SMEs) role and contribution in the world is
